

12-02-2021

Meeting was called to order and roll call was made, all in attendance were Chairperson Bernie Sosinsky, Board member Al Rosenthal, Business rep. Phillip Hoffmann, District members Alan Millin and Ed Schams. Absent Scott Kempley and Jim Felt.

Joe Dion gave a report on where we stand with the Dnr and current situation. DNR are doing some studies and reports, Joe expects to hear some results by mid-January. The committee discussed damages and effects that have been caused by the low water levels. Also discussed that we should not only be concerned about recreation on the lake but the long term affects like lack of business in our community, property values, fish habitat, shoreline damage etc. There was some discussion on dredging which would also be a long time fix for our lake, but we need to do more research with lakes like ours and lakes that have already done some these measures.

Everyone was in agreement we need to gather as much data as possible before our next meeting which will be January 20th at 4:30 p.m.

Meeting adjourned.
