Harvesting Update:

The crews have been working down the lake however, progress is slow. We have been working 4 days a week and have asked to extend the schedule. We will be adding one hour per day to the schedule however, we have two employees who have chosen not to work the extra hour. As most know, we have seen an extreme level of weeds which has slowed cutting speed as well as increasing the number of loads which must be transferred to shore and removed from the lake. Presently, we are finishing cutting the middle third of the east side and moving into the eastern most third. On the west side of the causeway, we have been cutting in the eastern two thirds and moving to the last third.

We will shortly be posting the current cutting permit on the website under harvesting for anyone who would like to see it.
